

# FINDOOR

REVOLUTIONARY FOLDING DOORS

# PERFECT ACCESS SOLUTION FOR ANY PREPARED OPENING

AGRICULTURAL | COMMERCIAL | INDUSTRIAL

Created in Finland, the **FINDOOR** access solution has spread throughout the world in less than 30 years, thanks in part to their unique design and proven durability.

Our doors are manufactured and assembled in Canada. Within the 30 years, there have been over 35,000 installations in both Europe and North America and minimal service calls a year, making **FINDOOR** North America's leading manufacturer of folding doors.

**FINDOOR**

No chains, springs or bulky rails. That means less moving parts and less that can go wrong.

---

It won't freeze, it won't rust, it won't get stuck, it will just work—guaranteed.

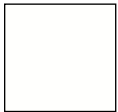

# FINDOOR FEATURES

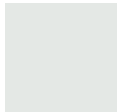

## COLOURS:

We use an SMP Paint System for our standard colours, protected with our 40 Year Paint Warranty. SMP (Silicone-Modified Polyester) paint systems are developed using a blend of polyester and silicone agents. The coating is formulated with a super durable modified polyester resin which provides superior resistance to chalking, fading and environmental weathering.

## LIFTING STEEL HINGES

- The lifting hinges ensure that the weather stripping seal has minimum wear on the ground.
- With minimal maintenance, the hinges will remain rust free and functional for decades.

## DOOR PANEL CONSTRUCTION:

- 24 Gauge steel panels epoxied to high density poly iso insulation providing R-12.5 value and a lower U-Value than overhead, bi-fold or sliding doors.
- Superior construction means strength, keeping weather out and keeping your environment the way you want it.

#### LATCH MECHANISM

- The **FINDOOR** Latch Mechanism secures the door for proper and perfect closing

#### EASY GRIP STAINLESS STEEL HANDLES

- Easy to open. Easy to close. Built to last for decades.

#### WEATHER-STRIPPING SEAL

- The weather-stripping, is made of EPDM Rubber and is amazing in extreme conditions.
- Safety is important. The FINDOOR weather-stripping has no pinch points.

#### FLOOR PLATE

- The **FINDOOR** floor plate is made of high quality, heavy duty steel.
- It reinforces the door to stand up against wind and intruders.

#### PANIC HARDWARE

- Exit device designed to provide fast and easy exit in emergency

*\*FINDOOR access solutions are Patent Pending*

# DOOR CONFIGURATION

## SIZES, PANELS, WINDOWS, MAN DOORS

Not every building is built the same and **FINDOOR** is the most flexible door in the world to configure.

- Multiple configurations with sizes up to 55 feet wide and 35 feet tall
- A **FINDOOR** man door can be placed right in a folding door.
- Installation as quick as 1.5 hours
- More flexibility with in-swing or out-swing doors that doesn't take up space inside or outside
- Can be installed on wood, concrete or steel
- A massive advantage with **FINDOOR** is the ability to install doors with limited headroom. In some cases **as little as 4 inches** is needed!
- **PANELS: 2, 3, 4, 5, 6, 7, 8**
  - Electric Operators can be used on Configurations of 2, 3 & 4 panel doors.
  - For 6 panels doors a Heavy Duty Operator Is required.

The flexible in-swing and out-swing doors provide access to the complete door opening when the doors are opened and does not take up space.

---

The **FINDOOR** revolutionary access solution is perfect for any **agricultural** or **commercial** building. Once the door is installed, it will easily function for decades without hassle.

---

**FINDOOR**
