

TRUCK RESTRAINT

METRO DOCK HYDRAULIC TRUCK RESTRAINT

The Metro Dock Hydraulic Restraint is designed with an arm that renders the trailer immobile by securing itself to the truck's ICC bar. The single-button control panel, in conjunction with the exterior traffic lights, ensures proper communication between the leveler operator and the driver by indicating the status of the restraint.

Key Features and Benefits:

- Low profile, non-impact design
- 30,000 lbs. restraining strength
- Interconnects to existing loading dock
- Holds a constant pressure on ICC bar
- Interior / Exterior communication package
- Zinc plated to resist corrosion

METRO DOCK HYDRAULIC TRUCK RESTRAINT

STANDARD FEATURES

1. **Constant pressure Head** – the restraining arm allows truck to float but not creep away from loading dock.

2. **Low profile housing** to prevent ICC bar impact prolonging the life of the restraint.

3. Manual **release valve** - in case of power failure.

4. **Limits** to activate audible alarm should ICC bar not be detected.

5. Easy access **Maintenance cover**.

Communication Package: Interior/exterior red/green LED lights; Interior/exterior mirrored image warning signs; Interior control panel with red/green/amber lights.

SPECIFICATIONS

1. 30,000 restraining force
2. Interconnected to existing Hydraulic Dock Leveler
3. Nema 12 control panel with single-button control ensures restraint is engaged prior to dock leveler begin cycle
4. Manual release valve in case of power failure
5. Zinc plated against corrosion
