

TRUCK SHELTER

# METRO DOCK INFLATABLE TRUCK SHELTERS

## S50 SERIES

Ideal for climate controlled environments these seals eliminate the gap between the truck and the building and form an air-tight seal. Unlike the foam dock seals, Inflatables reduce stress on the building wall by inflating after the truck is in position.

### Standard Features and Benefits:

- For openings ranging from 8' wide x 8' high up to 10' wide x 10' high
- 115 volt, ½ HP motor and blower on all units
- Moisture drainage holes

# METRO DOCK INFLATABLE TRUCK SHELTERS

## STANDARD FEATURES

The **S50** allows completely unobstructed access to the trailer while creating an airtight seal around the truck. The air bags of the **S50** inflate after the truck is in position and easily retract behind the side curtains for safe storage when not in use. The raked header allows water to drain off to the sides, keeping the loading area dry.

The best of both worlds, the **S51** combines the durable foam side pads from the dock seal with the inflatable header to accommodate trucks of varying heights. The raked header allows water to drain off to the sides, keeping the loading area dry.

The **S52** is a fully inflatable shelter built around a truck shelter frame, accommodating trucks of varying widths and heights. The metal side frame resists damage due to impact and the raked header allows water to drain off to the sides, keeping the loading area dry.

The **S53's** fully inflatable shelter's durable one-piece bag construction is completely frameless, making it the most versatile shelter at a loading bay that receives a variety of trailers. It is completely retractable, increasing its lifespan and preventing external damage.

## SPECIFICATIONS

- Yellow guide stripe
- Double stitching of all seams
- Aluminum trim covering all exposed edges (where applicable)
- Kiln dried lumber frame construction (where applicable)
- Bottom pads with "NO STEP" decal (where applicable)
- 30" protective steel guards (where applicable)

## OPTIONS

- 22 oz, 40 oz, Hi-tear Hypalon Fabric weights available
- Wear pleats; 4", 6", 8" exposure
- Custom applications
- Custom fabric colours available
- Steel Frame Construction
- Hot dipped galvanized

## ALSO AVAILABLE FROM METRO DOCK

- Dock shelters and bumpers
- Dock levelers
- Truck restraining systems
- Dock accessories
